

Ashmore Tavern, Gold Coast, QLD

Ashmore Tavern was established in 1985 and is today a popular meeting point for people living in and around the northern suburbs of the Gold Coast. The tavern has several bars including a sports bar, TAB and a dining and entertaining precinct. Local families are attracted to the venue because of a unique kids play area featuring toys, video games and movies.

Project Design Brief

For the new outdoor deck adjacent to the sports bar area, designers wanted a drainage system that could be incorporated along the sliding door. A discreet customised linear drain solution was required to allow accessibility and to preserve the visual continuity of the floor pattern.

ACO's Solution

- [RainTrak-O](#) system with custom Tile Insert tops
- Customised to suit sill and subsill requirements

Benefits

- 'V' shaped channel profile to aid water flow to outlet and minimise standing water.
- Nylon push pins isolate dissimilar metals.
- Custom made removable Tile Insert top to ensure fixing of tile with a continuous slot around the perimeter for efficient drainage.

Specifier

- BSPN Architecture

Other ACO products used

- Stormwater trench drains ([ACO Drain®](#))
- Cast floor drains ([ACO Wexel](#))
