

Junction Tower, Mango Hill, QLD

Junction Tower is a cutting-edge commercial building situated 27km north of Brisbane's CBD in the vibrant Moreton Bay region. Featuring a sleek architectural design, premium finishes, and modern amenities, the tower is poised to become a premier business destination in the area.

Project Design Brief

With eight levels, including ground-level shopfronts, the designers prioritized capturing wind-blown rain and heavy downpours before they could enter through doorways. Additionally, the drainage system would need some heel resistance.

ACO's Solution

- **RainTrak-O** system with Linéaire **Heelsafe**® *Anti-Slip* grates

Benefits

- Designed for integration with a drainable doorsill to create a flush entranceway.
- 'V' shaped channel profile to aid water flow to outlet and minimise standing water.
- Grates are slip rated to P1, AS 4586.
